

I am writing today in regards to bill SB 832.

While the overall goal of the bill seems fine, the inclusion of feral Cats and Dogs is worrisome. I am aware feeding wild animals is dangerous, but in the case of these 2 species, the folks feeding them are the same folks that run active TNR programs to trap, neuter and release the animals in order to reduce the populations.

This bill would seem to harm these efforts.

I would encourage you to work with the committee to have the bill amended to take these programs into account.
